Our core-plug aerators are simply the best buy on the market. We feature a pull type design (available with optional wheels for easier transportation) or a 3-point hitch design. Both are made using a 1 ¼” diameter drum that can be filled for additional weight. Our core aerators include a solid 1” cold rolled steel axle attached to pillow block bearings rather than bushings for longer life and better operation.

Our core-plug aerators utilize a standard ¾” x 7” core tine. The unique design allows our core tines to move slightly during operation thus allowing easier penetration if subsurface obstacles are encountered and enhances the release of the plugs thereby reducing the possibility of the core bars from becoming clogged up. An added feature of the 3-point hitch frame is that it has been designed to accept 16” blocks for added weight.

Our core-plug aerators are simply the best buy on the market. We feature a pull type design (available with optional wheels for easier transportation) or a 3-point hitch design. Both are built using a 1-1/2" diameter drum that can be filled for additional weight. Our core-aerators include a solid 1" cold rolled steel axle attached to pillow block bearings rather than bushings for longer life and better operation.

Our core-plug aerators utilize a standard 1-1/2" x 7" core tine. The unique design allows our core tines to move slightly during operation thus allowing easier penetration of subsurface obstacles and enhancing the release of the plugs thereby reducing the possibility of the core tines from becoming plugged up. An added feature of the 3-point hitch frame is that it has been designed to accept 16" blocks for added weight.

### Potato Plow

- Available in Both Pull Type and 3 pt. Hitch
- 12" Drum with 1" Plug to Fill Drum
- 2-3/4" Spikes @ 4" O.C.
- 3 pt. Hitch Frame Made 16" Wide to Stack Blocks for Extra Weight

### Baler Fork

- Heavy Wall Tube Construction
- 2" Adjustable Spear
- Universal Mounting Brackets
- Will Fit Most Front End Loaders
- Will Fit 3 Pt. Hitch Also
- Available with Paneratizar Pencil Spear

### Front Spear

- 2" Adjustable Spear
- Available with Paneratizar Pencil Spear

### Rear Spear

- Heavy Wall Tube Construction

### Potato Plow

- Available on pull types-gauge wheel kit.

### Heavy-Duty Box

- Adjustable Ripper Shank
- Reversible Cutting Edges
- 12" x 24" End Plates
- Designed for Maximum Material Volume
- Sizes 4', 5', 6', 7', 8'
Our core-plug aerators are simply the best buy on the market. We feature a pull type design (available with optional wheels for easier transportation) or a 3-point hitch design. Both are made using a 12” diameter drum that can be filled for additional weight. Our core aerators include a solid 1” cold rolled steel axle attached to pillow block bearings rather than bushings for longer life and better operation.

Our core-plug aerators utilize a standard 1/2” x 7” core tine. The unique design allows our cores to move slightly during operation thus lifting easier presentation. If subsurface obstacles are encountered and enhance the release of the plugs thereby reducing the possibility of the core tine from becoming stopped up. An added feature of the 3-point hitch frame is that it has been designed to accept 16” blocks for added weight.
