Since the 1940’s, Herd Seeder has been the industry’s innovative leader in Broadcast Seeders and Spreaders.

Kasco is proud to continue that heritage of quality and value.
The Model 2440 is the Big One! Cover Acres and Acres without Stopping

When looking for a high-capacity broadcast spreader, the 2440 is the logical choice. With a capacity of 32 bushels (2440#), the model 2440 will consistently and evenly spread seed, fertilizer or lime.

The Model 2440 comes equipped with hydraulic controls, to conveniently open and close the seed gate from the tractor seat.

- Quick-Hitch Compatible
- Heavy-Duty independent stand and carrying frame
- Hopper is 14-gauge steel, with full welded seam
- Powder coated finish for durability and rust-resistance
- Gearbox is standard for 540RPM, but can be ordered for 1000RPM
- Base Plate and Fan are aluminum with replaceable steel fan blades
- Base Plate will pivot to center the pattern of any material
- Shielded Telescoping Power Take Off shaft; Optional Hydraulic Drive System

### Optional Equipment Includes:

- Hopper Lids
- Lime Agitator for spreading dry or dehydrated lime
  - Hydraulic Open/Close Kit
  - Hydraulic Drive Motor/Valve Kit
- Banding Kits for Vineyard/Orchard Use
The Model 1200C is a Proven WorkHorse.

With 1200 pounds and 16 bushel capacity, the model 1200C will give you convenience and durability. Herd’s mounted seeders let you go any place your tractor can go, and will get you in the fields quicker.

With Herd’s precision metering system, the amount of seed can be controlled down to 3 pounds per acre. Fertilizer can be spread from 50 pounds to 1000 pounds per acre. No special parts are needed to change from seed to fertilizer.

- Easy-Adjust Pattern Control for even spread widths up to 40 feet
- Rotating agitator and aluminum fan driven by enclosed gearbox and shielded power take off shaft
- Heavy Duty 14-gauge steel hopper with Powder Coat Finish for added durability
- 540RPM gearbox is standard equipment; an optional 1000RPM gearbox is available.
- Optional hydraulic kit to open and close seed gate

The Model 750 Broadcaster is an ideal fit for category 1 tractors. With its convenient 750 pound or 9-1/2 bushel capacity, the model 750 works well for most smaller acreage jobs. It's maneuverable size works well for farms, orchards or groves, schools, parks and nurseries.

The Model 750 utilizes the same rugged fan assembly as Herd's larger broadcasters, providing consistent seeding of most any material.

- Round hopper base prevents lodging of material and assures even feeding
- 14-Gauge steel hopper with welded seems practically cleans itself
- Optional hydraulic motor and valve kit to power gearbox instead of PTO shaft
- Optional hydraulic remote control kit for additional convenience

Since the 1940’s, Herd Seeder has been the industry’s innovative leader in Broadcast Seeders and Spreaders.

Kasco is proud to continue that heritage of quality and value.
The GT-77 Electric Broadcast seeders are a perfect fit for ATVs, UTVs, Mowers, or Small Tractors. This seeder will eliminate hours of time spent hand-seeding and is ideal for seeding clover or alfalfa over wheat. It's Vibrating Agitator ensure a constant Sure-Feed of the material being spread. The heavy duty plastic fan will evenly spread material up to 28' wide, and the cast iron baseplate will center the spread pattern of all types of material.

Mounting Kits are available for most ATVs, UTVs, Mowers or 3-point hook-up.

---

- 12-Volt Motor (low amp draw)
- Wiring harness equipped with fuse for motor production and quick coupler for easy attachment and removal
- Four-bladed Plastic Fan for even pattern spread
- Heavy Duty Grey-Iron Base
- Galvanized Hopper with 1.2 bushel (77#) capacity
- Hopper Lid to keep material in hopper and dry at all times
- Stainless Steel Pivot Plate for Years of Service

The M3B Electric Seeder was designed for spreading Seeds, Fertilizers, Granular Herbicides, and Ice Melters.

This versatile spreader was engineered to be mounted to farm tractors or pickup trucks.

An optional rheostat allows the spread width to be controlled from 10 feet to 30 feet. The amount of material being spread can be accurately controlled with the maximum spread width depending upon the density of the material being spread.

- Galvanized Steel Hopper with Hinged Lid
- Steel Frame
- Vibrating Rate Gate for Constant Material Feed
- Remote Off/On Controls (Rope & Pulley System)
- 12-Volt Motor and Wiring Kit with Switch Included

OPTIONAL EQUIPMENT
* Hopper Extension
* 2” Receiver Hitch Mounting
* 3-Point Hitch Mounting
* Rheostat for width control

170 West 600 North
Shelbyville, IN 46176

SALT/SAND SPREADERS

Herd Salt/Sand Spreaders are rugged enough for heavy duty ice control usage. Whether personal use or commercial, the Herd Spreaders are ideal for parking lots, driveways, and sidewalks of any size.

Our unique agitator system ensures positive feed of all materials. The Herd Salt/Sand Spreaders can spread WET sand stored OUTSIDE, and sand mixed with salt or calcium chloride.

Three Sizes of PTO Powered Spreaders from which to Choose:

- Model 5.5 holds 550# of wet sand, or 5.5 cu.ft. of material
- Model 750S holds 1200# of wet sand, or 12 cu.ft. of material
- Model 1200S which holds 2000# of wet sand or 20 cut.ft. of material
The Herd Salt/Sand Spreader is the Tool for Efficient Deicing. Ideal for Parking Lots and Walk-Ways, The model 750SSS couples the versatility of today’s Skid Steers with the Durability that Herd is known for. Utilizing our unique agitator design, the Herd Salt/Sand Spreader is the most effective method of spreading any combination of sand (*wet or dry*), salt, and calcium chloride.

- Easy to hook-up with a flow valve on the hydraulic motor to control width of spread from driver’s seat
- Universal skid steer attaching design for easy compatibility and security
- Rugged 14 gauge hopper to withstand the heaviest use
- Powder-Coated Paint to endure the elements
- Capacity of 1200# wet sand, or 12 cubic feet of material.
“Here’s the Scoop”
Skid Steer Mounted Scoop & Spread

Our Simple to Use Design allows More Productivity with Less Manpower. Simply Tilt the Hopper forward, Push Into your Sand Pile until Full, Tilt Back, and Spread Sand!
