EDGE-EZE™ EDGER
Clean, sharp edges in record time.

Replaces two-cycle edgers and multiple operators for increased productivity and huge cost savings.

Dependable, heavy-duty construction makes Edge-EZE™ ideal for commercial use.

Depth of cut is 2-1/2 inches (from hub to edge of tempered disc) for a clean, sharp edge that will satisfy the most demanding customers.

Edge-EZE™ maintains established edge at up to 500 ft./min.

IT'S SO MUCH MOWER™

Optional bracket mounts edger to left side of side-discharge deck and to either side of rear-discharge deck.

Streamline the edging process and reduce edging time up to 75%!

Edge-EZE™ delivers a clean, sharp edge along sidewalks, roadways and driveways, and saves valuable time and labor edging large areas and long runs.

- Replaces two-cycle edgers and multiple operators for increased productivity and huge cost savings.
- Dependable, heavy-duty construction makes Edge-EZE™ ideal for commercial use.
- Depth of cut is 2-1/2 inches (from hub to edge of tempered disc) for a clean, sharp edge that will satisfy the most demanding customers.
- Edge-EZE™ maintains established edge at up to 500 ft./min.
- Perfect for maintaining established edges. Lever raises blade for easy transport.
- Electric actuator provides additional down pressure for edging in overgrown or tough conditions. Actuator also raises blade 4 inches at the touch of a switch to cross sidewalks.
- Edge-EZE™ connects to discharge side of deck in place of standard discharge shield and is held in place with the same thumb screw.

Case Study
A two-mile stretch of sidewalk at a golf course equals four miles of edging. It takes two workers with hand-held edgers 16 hours each (or 32 man-hours) of labor to maintain this each time. The same job takes one operator with a Grasshopper and Edge-EZE™ only four hours.

Annual cost of NOT using Grasshopper = $10,228

CUTTING EDGE.
Edge-cutting.

A reversible, concave, self-sharpening, tempered blade and weighted hub assembly maintains a clean, sharp edge from sidewalk, curb or turf.

A 12-inch vertical adjustment lets you edge from street or ground level, depending on your needs.

Edge-EZE™ discharge shield allows you to blow debris off sidewalk into turf.

Reverse disc by removing one bolt to edge from the turf.
