Engineered, Designed and Manufactured in the USA
Power Landscape Rakes

Power Landscape Rakes are the ideal tool for the landscape contractor, large property owner, rental yard, park & recreation department or turf management professional. They do it all, prep, smooth, set grade, level, till, remove rocks and create the perfect seedbed.

• Quick-flip side shields are self-storing on the unit allowing ease of windrowing rocks or debris
• Durable triple sealed bearings with bearing protectors for long service life
• Time saving replaceable rotor bearing assemblies
• Choice of rotors – 2” Sabre Tooth or 1-3/4” Carbide Tooth
• Auto adjust chain tensioner is standard on all models
**05-Series** Powered Landscape Rakes

Designed for use on Mini / Compact Skid Steers, the hydraulically driven 05-Series offers economy and performance. Standard equipment includes a #60 chain drive, flip-up side shields and single center mounted gauge wheel – all supported by a 3” x 3” x 3/16” all-welded frame. As with all models, these Power Rakes feature an environmentally friendly dry chain case, reducing maintenance costs.

**10-Series** Powered Landscape Rakes

Elevating productivity, the 10-Series Power Rakes for Mini / Compact Skid Steers features a #80 chain drive, flip-up side shields, dual gauge wheels, adjustable material bar and optional hydraulic angle.

As with all Power Rakes, bearing protectors and environmentally friendly dry chain case are standard equipment.

⚠️ **WARNING:** Read and understand the operator’s manual before operation. Be sure power unit is properly counterbalanced. Damage to equipment or personal injury could occur.
## 20-Series Powered Landscape Rakes

Responsive and reliable, the 20-Series is designed for Skid Steers up to 65 HP. Features a #80 chain drive, dual flip-up gauge wheels, flip-up side shields and an all-welded frame constructed of 3” x 4” x 1/4” tubing. Also standard are reliable gauge wheels (16 x 6.50-8) mounted to 4-bolt hubs and a “Flex & Float” System offering the operator flexibility to choose maximum down pressure or float position for site prep.

## 65-Series Powered Landscape Rakes

Consistently delivering high performance, the 65-Series is designed for Skid Steers over 65 HP. It’s rugged 4” x 4” x 1/4” frame supports dual flip-up gauge wheels (18.5 x 8.50-8) on 5-bolt hubs, flip-up side shields, adjustable material bar and environmentally dry chain case. A double #80 chain transfers the power to the rotor while chain tensioners of UHMW material provides the correct tension.

## 25-Series Powered Landscape Rakes

Get more done with a compact tractor when using one of our 25-Series Power Rakes designed for tractors of 24-40 HP. Standard equipment includes a #80 drive chain for dependable power transfer, PTO with slip clutch, dual flip-up gauge wheels, flip-up side shields for easy storage on the machine and adjustable material bar for controlling processed material flow.

## 40-Series Powered Landscape Rakes

Providing ingenious solutions for your site prep needs, the 40-Series 3-pt mounted Power Rakes are matched to tractors of 35-75 HP. Standard features include PTO with slip clutch for sure power transfer, double #80 chain drive for long service life, rugged 4” x 4” x 1/4” frame, dual flip-up gauge wheel on 5-bolt hubs and heavy-duty adjustable material bar to control processed material flow.

**WARNING:** Read and understand the operator’s manual before operation. Be sure power unit is properly counterbalanced. Damage to equipment or personal injury could occur.
**Power Rake Features**

**Flip-up Gauge Wheels** (height adjustable) – Allows accurate control of working depth, keeping machine level for smoother surface finish. Operator can easily move the gauge wheels into the up position for transport on a trailer, reducing the space needed.

**Flip-up Side Shields** – Operator can easily move the shield out of the way for work where shields are not required. Shields are always with the machine, reducing the chance of misplacement.

**Rotor Choice** – Available with a carbide aggressor tooth (1-3/4”) or 2” Sabre tooth (heat treated alloy material). Sabre tooth offers excellent reliability and performance for general use. Aggressor tooth offers more aggressive tilling action.

**Dry Chain Case** – Environmentally friendly dry chain case reduces maintenance as there is no oil to contend with. Chain only requires lubrication every 15-20 hours and is simply done by removing the chain case cover.

**Heavy-Duty Chain** – Chain is #60, #80 or double #80 depending on model. Chain size is matched to the machine for maximum power transfer. Tension is provided by serviceable chain tensioners of UMHW material for longer wear and reliability.

**Adjustable Material Bar** – Standard on all models for controlling processed material flow. Allows the operator to adjust to soil conditions increasing versatility of the unit.

**Triple Seal Rotor Bearing with Replaceable Housing** – Bearing housing of ductile material is replaceable, extending the life of the machine. Triple seal bearing keeps dirt out, providing more uptime.

**Bearing Protectors** – Standard on both sides of bearing on non-drive-end, or on rotor side of bearing on drive-end. Protects bearings from wrapping with material, thus increasing the service life of the bearings.

**Lifting Point** – Built-in lifting hook is standard on all machines for easier loading / unloading of machine.

**Flex & Float System** – Skid Steer units feature a “Flex & Float” mount. Allows the operator the flexibility to choose maximum down pressure for preliminary site prep, then switch to float position for final site preparation.
